CURRICULUM VITAE

Douglas Gray

Principal Applied Scientist

douglas.ryan.gray@gmail.com | de3ug.github.io

Portola Valley, California | Google Scholar | LinkedIn

Applied scientist and research leader in multimodal AI and real-time interfaces. Led teams of up to 20 and built visual product search from live camera feeds and uploaded images, image-based navigation and query suggestions in shopping search, and integrations with conversational AI assistants.

Professional & Research Experience

Principal Applied Scientist

2025-June 2026

Amazon Visual Search

- Originated Amazon's real-time AI image generation in search autocomplete, turning descriptive shopping queries into tappable visual suggestions for similar products; launched to select customers 124 days after goal setting, using AI-native development and coding agents to accelerate delivery.
- Defined the high-level architecture, GPU-saving prefix cache, safety mechanisms, and quality evaluation; coordinated a 45-person organization across seven parallel workstreams to deliver the launch.
- Served as principal technical lead for Lens Live, a continuous visual search experience integrated with Rufus for product insights; launched to tens of millions of customers.
- Architected the mobile ML pipeline for on-device product detection, tracking, and session state management, enabling continuous low-latency identification as the camera moved.
- Established technical ownership across Lens and Rufus teams in Palo Alto, Seattle, New York, and London: product identification and recognition in Lens, with LLM-generated product insights and follow-up interactions in Rufus.
- Co-authored work on universal generative multimodal retrieval (CVPR 2025) and reinforcement learning for self-verification in multimodal reasoning agents (ECCV 2026).

Senior Manager, Applied Science
2020-2025

Amazon Visual Shopping

- Led an organization of 15-20 applied scientists and engineers, including an applied science manager and up to four software engineers; owned science goals, research direction, and technical artifacts for visual search.
- Completed the transformation of Amazon Lens into a unified deep-learning, embedding-based retrieval system over more than 1 billion products, retiring the classical computer vision pipeline.
- Increased the share of Amazon Lens sessions with at least one search-results click from 19% to over 40% in 2023 and improved retention by four percentage points; Lens subsequently exceeded 1 billion annual queries.
- Launched multimodal image-plus-text search and an icon on search results that lets customers find visually similar products; expanded icon coverage from an initial dresses experiment to more than 90% of search-result-page impressions, weighted by traffic.
- Led the team that added product images to search autocomplete, delivering more than $600 million in annualized incremental revenue, summed across A/B tests run in 2024.
- Developed scientists and engineers across levels, including promotion of a principal engineer in 2022 and a principal scientist in 2024; established written science roadmaps, weekly research reviews, and technical deep dives.
- Connected production systems with external research, including KDD system papers on Shop the Look (2022) and multimodal visual search (2024).

Manager, Applied Science
2016-2020

Amazon Visual Search & AR

- Led up to 12 applied scientists and engineers and introduced deep learning to Amazon's visual search stack, building a new system beyond the flat and printed objects supported by the classical computer vision pipeline.
- Expanded recognition from an initial launch covering approximately 100 product categories to more than 100,000 fine-grained search strings using models trained on Amazon query logs.
- Developed instance-level visual retrieval over approximately 10 million products in apparel and home; launched StyleSnap for fashion in 2019 and StyleSnap for Home in 2020.
- Established a weekly science review built around written experimental updates, technical decisions, and project ownership to manage ambiguous applied research work.

Applied Scientist
2011-2016

A9.com Visual Search

- Early applied scientist on A9's visual search team; built recognition and tracking for A9 Flow, an augmented reality shopping application that identified multiple products in a scene and overlaid results in real time.
- Developed recognition, tracking, scene-text detection, and OCR libraries subsequently integrated into the Amazon mobile app and Amazon Fire Phone; supported uses including phone numbers, addresses, and business-card scanning.
- Built video content alignment tools for IMDb X-Ray that transferred existing annotations when studios redelivered video, reducing manual timestamp alignment work.
- Implemented classical computer vision algorithms in high-performance C++ and contributed inventions across visual search, text recognition, video analysis, and camera interfaces.

Research Scientist
2010-2011

Akiira Media Systems, Palo Alto

- Built a video content search engine at an early-stage computer vision startup.
- Developed summarization tools for iTwips.com, a news website providing article summaries and story clustering, and iBlips, a video summarization API; both used similar algorithms.
- Applied singular value decomposition to hand-crafted multimedia features; contributed new clustering approaches and product interface design.

Research Associate
2009

Smith-Kettlewell Eye Research Institute, San Francisco

- Prototyped a Nokia N95 application to locate fiducial targets for assistive navigation and object identification by people with visual impairments.
- Improved target detection using accelerometer data to estimate the horizon; co-developed a one-dimensional barcode beneath the fiducial targets to encode information.

Graduate Intern
2008-2009

Intel Corporation, Santa Clara

- Developed a prototype mobile augmented reality system for mobile internet devices.
- Improved large-scale image matching with keypoint indexing and geolocation filtering; built a database of geotagged Wikipedia articles and images.
- Published WikiReality at ICME 2009 and contributed the image-matching invention documented in a U.S. patent application.

Research Intern 2007-2008

NEC Labs America, Cupertino

- Researched automatic facial beauty prediction and enhancement using web images; developed learning methods operating on image appearance without manually annotated facial landmarks, published at ECCV 2010.
- Contributed face alignment software and a demographic recognition demonstration for retail analytics, using camera imagery to characterize shopper populations.

Engineering Intern 2006

SAIC Advanced Concepts Division

- Delivered a multi-object tracking library implementing Reid's multiple-hypothesis tracking algorithm.
- Extended the approach to multiple cameras and explored homography estimation from tracking data.

Graduate Student Researcher 2006-2009

Visual Computing Lab, UC Santa Cruz

- Conducted research with Hai Tao on viewpoint-invariant person recognition, appearance models, and crowd analysis.
- Collected and released the VIPeR benchmark: 632 pedestrian image pairs across camera viewpoints, with baseline evaluations published at PETS 2007 and ECCV 2008.
- Developed the Ensemble of Localized Features (ELF), using AdaBoost to select local color and texture features and learn a cross-camera similarity function; evaluated retrieval quality with cumulative matching characteristic (CMC) curves independently of camera geometry and timing.

Teaching Assistant 2006-2009

Computer Engineering, UC Santa Cruz

- Supported multiple terms of Microprocessor Design (CMPE 121), Stochastic Methods (CMPE 107), MATLAB (AMS 27L), Universal Access (CMPE 80A), and Technical Writing (CMPE 185).

Undergraduate Research Assistant 2004-2005

Visual Computing Lab, UC Santa Cruz

- Developed active camera tracking using mean-shift and pan-tilt-zoom control, multiple-hypothesis object tracking, and crowd-density estimation tools.

Co-founder, Art Director & CFO 2003-2005

Static Printing Inc.

- Co-founded a screen-printing business, overseeing design and finances.
- Transferred ownership to a co-founder, who continued and grew the business as Your Logo Here, LLC.

Education

Ph.D. Candidate (ABD) 2005-2010

Computer Engineering, UC Santa Cruz

- Advanced to candidacy in 2008; dissertation proposal: Privacy Preserving Pedestrian Recognition. Doctoral degree not completed.

B.S. 2001-2005

Computer Engineering, UC Santa Cruz

- B.S. in Computer Engineering; conducted undergraduate research in the Visual Computing Lab.

Professional Service

Workshop co-organizer. Multimodal Representation and Retrieval (MRR), SIGIR 2024 and ICCV 2025; served as lead organizer and advisor. Website.

Conference organizer and advisor. Amazon Computer Vision Conference (ACVC); lead organizer on two occasions, including the 2020 event, which moved to a virtual format attended by approximately 400 people; advisor in other years.

Area chair. WACV.

Peer reviewer. CVPR, ICCV, ECCV, WACV, and NeurIPS.

Patents

44 U.S. patents and 2 applications.

[P01] **Object classification for visual search**. Amit Kumar K C, Arnab Dhua, **Doug Gray**. US12430882B1 (2025-09-30).

[P02] **Multimodal search and refinement**. Xinliang Zhu, Arnab Dhua, Son D. Tran, **Douglas Ryan Gray**. US12210516B1 (2025-01-28).

[P03] **Media processing techniques for enhancing content**. **Douglas Ryan Gray**, Arnab Sanat Kumar Dhua, Xiaofan Lin, Zhijiang Mark Lu. US12106333B2 (2024-10-01); US11699174B2 (2023-07-11); US10963924B1 (2021-03-30). Related patents.

[P04] **Augmented reality recommendations**. Xiaofan Lin, Arnab Sanat Kumar Dhua, **Douglas Ryan Gray**, Atul Kumar, Yu LOU. US11227326B2 (2022-01-18); US10506168B2 (2019-12-10); US9646335B2 (2017-05-09); US9183583B2 (2015-11-10). Related patents.

[P05] **Neural network-based image manipulation**. **Douglas Ryan Gray**, Alexander Li Honda, Edward Hsiao. US10956784B2 (2021-03-23); US10157332B1 (2018-12-18). Related patents.

[P06] **Object tracking in zoomed video**. Charles Benjamin Franklin Waggoner, Colin Jon Taylor, Jeffrey P. Bezos, **Douglas Ryan Gray**. US10664140B2 (2020-05-26); US9626084B2 (2017-04-18). Related patents.

[P07] **Visual search suggestions**. Edward Hsiao, **Douglas Ryan Gray**, Nityananda Jayadevaprakash, Xiaofan Lin, Mark Jay Nitzberg, Shruti Sheorey. US10540378B1 (2020-01-21).

[P08] **Video segmentation techniques**. Adam Carlson, **Douglas Ryan Gray**, Ashutosh Vishwas Kulkarni, Colin Jon Taylor. US10528821B2 (2020-01-07); US9436876B1 (2016-09-06). Related patents.

[P09] **Expanded previously on segments**. Adam Carlson, Jeromey Russell Goetz, Ashutosh Vishwas Kulkarni, **Douglas Ryan Gray**, Danny Ryan Stephens, Colin Jon Taylor, Ismet Zeki Yalniz. US10469918B1 (2019-11-05); US9813784B1 (2017-11-07). Related patents.

[P10] **Crowdsourced audio normalization for presenting media content**. **Douglas Ryan Gray**, Colin Jon Taylor, Ming Du, Wei-Hong Chuang. US10466955B1 (2019-11-05).

[P11] **Self-portrait enhancement techniques**. **Douglas Ryan Gray**, Colin Jon Taylor, Xiaofan Lin. US10121229B2 (2018-11-06); US9247129B1 (2016-01-26). Related patents.

[P12] **Attribute similarity-based search**. Ming Du, Arnab Sanat Kumar Dhua, **Douglas Ryan Gray**, Maya Kabkab, Aishwarya Natesh, Colin Jon Taylor. US10043109B1 (2018-08-07).

[P13] **Text entity recognition**. **Douglas Ryan Gray**, Xiaofan Lin, Arnab Sanat Kumar Dhua, Yu LOU. US10013624B2 (2018-07-03); US9256795B1 (2016-02-09). Related patents.

[P14] **Video content alignment**. Ismet Zeki Yalniz, Adam Carlson, **Douglas Ryan Gray**, Colin Jon Taylor. US9984728B2 (2018-05-29); US9275682B1 (2016-03-01). Related patents.

[P15] **Augmented reality Camera Lucida**. **Douglas Ryan Gray**. US9965895B1 (2018-05-08).

[P16] **Text recognition for search results**. Arnab Sunat Kumar Dhua, **Douglas Ryan Gray**, Xiaofan Lin, Yu LOU, Adam Wiggen Kraft, Sunil Ramesh. US9934526B1 (2018-04-03).

[P17] **Providing overlays based on text in a live camera view**. **Douglas R. Gray**, Arnab S. Dhua, Yu LOU, Sunil Ramesh. US9922431B2 (2018-03-20); US9165406B1 (2015-10-20). Related patents.

[P18] **Image processing techniques for self-captured images**. **Douglas Ryan Gray**. US9911237B1 (2018-03-06).

[P19] **Generating search strings and refinements from an image**. Edward Hsiao, **Douglas Ryan Gray**. US9875258B1 (2018-01-23).

[P20] **Automated highlighting of identified text**. Adam Wiggen Kraft, Arnab Sanat Kumar Dhua, **Douglas Ryan Gray**, Xiaofan Lin, Yu LOU, Sunil Ramesh, Colin Jon Taylor, David Creighton Mott. US9870633B2 (2018-01-16); US9582913B1 (2017-02-28). Related patents.

[P21] **Adaptive image sampling for text detection**. **Douglas Ryan Gray**, Arnab Sanat Kumar Dhua, Yu LOU, Ismet Zeki Yalniz. US9569679B1 (2017-02-14).

[P22] **Intelligent video navigation techniques**. **Douglas Ryan Gray**, Adam Carlson, Ashutosh Vishwas Kulkarni, Anna Makris, Colin Jon Taylor. US9564177B1 (2017-02-07); US9558784B1 (2017-01-31). Related patents.

[P23] **Detection of cast members in video content**. Arnab Sanat Kumar Dhua, Gautam Bhargava, **Douglas Ryan Gray**, Sunil Ramesh, Colin Jon Taylor. US9449216B1 (2016-09-20); US20160358015A1 (application) (2016-12-08). Patent and application.

[P24] **Collaborative text detection and recognition**. Xiaofan Lin, Adam Wiggen Kraft, Yu LOU, **Douglas Ryan Gray**, Colin Jon Taylor. US9436883B2 (2016-09-06); US9098888B1 (2015-08-04). Related patents.

[P25] **Image-based character recognition**. Xiaofan Lin, Arnab Sanat Kumar Dhua, **Douglas Ryan Gray**, Yu LOU. US9390340B2 (2016-07-12); US9043349B1 (2015-05-26). Related patents.

[P26] **Verifying ownership of content**. **Douglas R. Gray**. US9317669B1 (2016-04-19).

[P27] **Automated recognition of text utilizing multiple images**. **Douglas Ryan Gray**, Colin Jay Taylor, Xiaofan Lin, Adam Wiggen Kraft, Yu LOU, Arnab Sanat Kumar Dhua. US9292739B1 (2016-03-22).

[P28] **Image matching for mobile augmented reality**. **Douglas R. Gray**, Yi Wu, Igor V. Kozintsev, Horst W. Haussecker, Maha El Choubassi. US20100309225A1 (application) (2010-12-09).
